Evidence to support Part C of Policy CS10

Calculate any residual carbon emissions from the development

Evidence to support Part B of Policy CS10

Provide calculations showing annual carbon dioxide savings potential from preferred technology / mix of technologies.

Evidence to support Part A of Policy CS10

Completed CSH / BREEAM Pre-Assessment Estimate

Measures being incorporated into the scheme to achieve the required environmental rating (CSH/BREEAM)

Carbon/Energy Assessment showing total energy demand of the development once completed.

An assessment of different low carbon and/or renewable energy technology options available to meet the required reduction target required

How the development addresses key resource issues; energy, waste, materials, biodiversity etc.

Development commitments and sustainability principles

Applicants response to key sustainability policies set out in the Core Strategy: CS1 (e), CS1 (m), CS9 (i), CS10, CS11.
